Flu shot ingredients

Following are the typical ingredients in a Flu Shot Injection that "they" do not tell you about:

- **Thimersol** (Mercury disinfectant/preservative)
- **Aluminum** (additive to promote antibody response) - implicated as a contributor to Alzheimer's, seizures, fatigue, mental problems
- **Formaldehyde** (disinfectant) (let's embalm ourselves alive!) - incidentally, it's what aspartame aka NutraSweet converts to at a mere 30 degrees C or 86 degrees F
- **Ethylene Glycol** (anti-freeze-deadly-poison) - seems to do nothing constructive at all
- **Phenol** (disinfectant)
- **Benzethonium Chloride** (antiseptic)
- **Methylparaben** (anti-fungal, preservative)

End
